

15th European Conference on Composite Materials (ECCM 15)
Venice, Italy, June 24-28, 2012
(<http://www.eccm15.org/>)

Special Session on
Structural Performance and Damage Tolerance of Advanced Composites

Papers are solicited for the above session for the international meeting in Venice in June, 2012. All aspects of composite design, particularly, damage tolerance which includes initial damage e.g., from impact or from processing flaws and subsequent damage growth under service loading under fatigue, creep etc. can be addressed. Special considerations for sandwich composite design and related damage tolerance issues are also of interest. Abstracts based on the conference requirement (please go to the conference website shown above) should be submitted to:

Professor Golam Newaz
Department of Mechanical Engineering
Wayne State University
Detroit, MI 48202
734-223-1006
FAX: 313-577-8789
gnewaz@eng.wayne.edu

You need to e-mail your abstract by Oct. 15, 2012 to Professor Golam Newaz. You can simultaneously submit it to the ECCM website. Because of limited number of contributions that can be accepted, potential participants are encouraged to send the title of the abstract and paper with affiliation to Professor Newaz as soon as possible.
